EDUCATION

Ph.D. in Electrical Engineering

Northwestern University, Evanston, IL Sep 2008 – Apr 2014
Research area: Optoelectronics, Solid State Physics, Infrared Detection
Dissertation topic: “Planar Engineering for Dark Current Suppression in Type-II InAs/GaSb Superlattice Photodiodes”
Research advisor: Manijeh Razeghi

M.S. in Microelectronics

Royal Institute of Technology, Stockholm, Sweden Sep 2007 - Aug 2008
Research area: Optoelectronics, Solid State Physics, Infrared Detection
Thesis title: “Fabrication, Characterization and Analysis of Type-II InAs/GaSb Superlattice Photodiodes”
Research advisor: Alex Grishin

B.S. in Physics

Ecole Polytechnique, Palaiseau, France Sep 2004 - July 2007
Research area: Optics, Solid State Lasers, Condensed Matter Physics
Thesis title: “A Decoy-State Protocol for the Implementation of Quantum Key Distribution”
Research advisor: Anders Karlsson

PROFESSIONAL EXPERIENCE

University of Illinois at Urbana-Champaign, Urbana, IL Jan 2020 – present
Assistant Professor of Electrical Engineering

University of Illinois at Urbana-Champaign, Urbana, IL Sep 2019 – Dec 2019
Adjunct Assistant Professor of Electrical Engineering

Purdue University, West Lafayette, IN Apr 2014 – Dec 2019
Postdoctoral Research Associate – Birck Nanotechnology Center
Research topic: Plasmon-assisted single-photon sources and spin-based sensors
Research advisor: Vladimir M. Shalaev

RESEARCH INTERESTS

1. Integrated quantum photonics
2. Nanophotonics, optical metamaterials and plasmonics
3. Semiconductor physics and optoelectronics

PUBLICATIONS

Journal publications (*h*-index = 15, 752 citations as of December 2020)

Articles in preparation

1. A. Solanki, **S.I. Bogdanov**, A. Rustagi, P. Debashis, N. Dilley, T.-T. Shen, Y.-P. Chen, J. Appenzeller, V.M. Shalaev, A. Boltasseva and P. Upadhyaya, “Electric field control of interaction between magnons and quantum spin defects”, preprint available on *arXiv* at <http://arxiv.org/abs/2012.01497>
2. **S.I. Bogdanov**, O.A. Makarova, A.S. Lagutchev, D. Shah, C.-C. Chiang, S. Saha, A.S. Baburin, I.A. Ryzhikov, I.A. Rodionov, A.V. Kildishev, A. Boltasseva and V.M. Shalaev, “Deterministic integration of single nitrogen-vacancy centers into nanopatch antennas”, preprint available on *arXiv* at <http://arxiv.org/abs/1902.05996>

Published articles

HONORS AND AWARDS

- 2018 - Best Presentation Award, OSA IONS Midwest Conference, (Purdue University, USA)
- 2018 - Preparing Future Faculty Scholarship (Stony Brook University, USA) - \$700
- 2018 - Postdoc Travel Grant Award for Professional Conference (Purdue University, USA) - \$500
- 2017 - The Graduate School Postdoc Travel Grant (Purdue University, USA) - \$440
- 2016 - The Graduate School Postdoc Travel Grant (Purdue University, USA) - \$440
- 2015 - Best Poster Award and Travel Fellowship, Metamaterials Science and Technology Workshop, (San Diego, USA) - \$1 000
- 2015 - Best Poster Award, Enrico Fermi Summer School in Complex Photonics, (Varenna, Italy) - €300
- 2013 - Cabell Terminal Year Fellowship (Northwestern University) – full final year tuition and stipend funding
- 2011 - Dow Sustainability Innovation Student Challenge Award (Chicago, USA) - \$10 000, received by the team consisting of C. Wilmer, T. Phan, **S.I. Bogdanov** and E. Hoxha
- 2011 - 3rd place, Scientists Without Borders Global Malnutrition Challenge Prize (InnoCentive, USA) - \$1 000, received by the team consisting of C. Wilmer, T. Phan, **S.I. Bogdanov** and E. Hoxha
- 2009 - Shared 1st place Nature.com Clean Water Distribution Challenge Prize (InnoCentive, USA) - \$4 000, received by the team consisting of C. Wilmer, T. Phan and **S.I. Bogdanov**
- 2008 - Finalist, Diversity Challenge (Academic Search, Sweden)
- 2004 - Scholarship for Outstanding International Students (Ecole Polytechnique Foundation, France)
- 2001 - Honorable Mention, National Mathematics Competition (France)
- 2000 - 3rd place, Olympiades Academiques de Mathematiques (France)

FUNDRAISING ACTIVITIES AND UNIVERSITY SERVICE

1. Extensive experience in drafting winning research and equipment grant proposals (four instrumentation proposals resulting in total awarded funds of **\$623k**; nine research proposals with total awards in excess of **\$1.8M**)
2. Leading member of the local organizing committee of the Purdue Quantum Center 2015 Kickoff Conference hosting 36 world leading faculty members in the area of Quantum Physics, scientific journal editors and Department of Defense program managers, as well as over 200 attendees

SELECTED MEDIA COVERAGE

1. *Eurekalert* (AAAS), “New machine learning-assisted method rapidly classifies quantum sources” (09/10/2020)
2. *Kommersant Nauka*, Разгон до сотен терагерц. Улучшены параметры самого яркого источника одиночных фотонов. (“Speedup into the terahertz range – improving the performance of the brightest single-photon sources”, in Russian, 08/25/2020)

6. **Conference on Lasers and Electro-Optics**, FTu4E.6, San Jose, CA (2018)
7. **SPIE Optics and Photonics**, Quantum Nanophotonics, 10359-20, San Diego, CA (2017)
8. **Conference on Lasers and Electro-Optics**, FW4H.3, San Jose, CA (2017)
9. **SPIE Optics and Photonics**, Metamaterials, Metadevices, and Metasystems, 9918-81, San Diego, CA (2016)
10. **SPIE Optics and Photonics**, Metamaterials, Metadevices, and Metasystems, 9544-16, San Diego, CA (2015)

CAMPUS AND DEPARTMENTAL TALKS

1. “Plasmon-enhanced quantum emitters for ultrafast quantum photonics”, IQUIST seminar, University of Illinois, (2020)
2. “Ultrabright sub-nanosecond emission from single nitrogen-vacancy centers in nanodiamonds” OSA IONS Conference, Purdue University, West Lafayette, IN (2018)
3. “Material platforms for integrated quantum photonics”, NSAC conference, Purdue University, West Lafayette, IN (2016)
4. “Practical nanophotonics: new approaches and material platforms”, 10th anniversary celebration of Birck Nanotechnology Center, Purdue University, West Lafayette, IN (2016)

RESEARCH EXPERTISE AND TECHNICAL SKILLS

Optical characterization techniques, including time-resolved single-photon counting, optical and Fourier spectroscopy, optically detected magnetic resonance. Cryogenic electrical characterization techniques such as sensitive current-voltage and capacitance-voltage measurements, spectral noise characterization and photodetector quantum efficiency measurements. Structural device characterization via scanning electron microscopy, optical profilometry and atomic force microscopy. A wide variety of semiconductor device processing techniques including lithography, wet and dry etching, e-beam, and thermal evaporation as well as plasma-enhanced chemical vapor deposition (PECVD). Packaging techniques, for instance flip-chip bonding, underfilling, substrate removal and polishing. Electromagnetic simulation with analytical and numerical methods using software tools such as COMSOL Multiphysics and Matlab. Large-scale experimental setup automation and data acquisition via Labview, Matlab and microcontroller programming.

RESEARCH EXPERIENCE AND ACCOMPLISHMENTS

Purdue University, West Lafayette, IN

Apr 2014 – present

Birck Nanotechnology Center

Postdoctoral Research Associate – Birck Nanotechnology Center

Research topic: Plasmon-assisted single-photon sources and spin sensors

1. **Demonstrated the world's brightest room-temperature quantum emitter:** a nitrogen-vacancy center in diamond enhanced by a plasmonic nanoantenna, with a detected photon rate of over 30 million counts per second
2. **Demonstrated coherent spin dynamics from a single nitrogen-vacancy center deterministically coupled to a plasmonic nano-patch antenna.** Showed that the spin coherence time of nitrogen-vacancy centers in nanodiamonds is preserved even in direct proximity to metal nanostructures.
3. **Demonstrated record-high fluorescence lifetime shortening of 3500 times** at room temperature in nanodiamond-based nitrogen-vacancy centers by deterministically coupling to plasmonic nanoantennas.
4. Designed, acquired and assembled the experimental setup for optical characterization of quantum emitters, including a home-built confocal scanning microscope interfaced with an atomic force microscope a femtosecond excitation laser source and picosecond-scale photon correlation capability
5. Developed an autonomous algorithm for a large-area identification and characterization of quantum emitters randomly dispersed on a substrate, analyzing one emitter per minute and able to locate emitters with user-specified properties
6. Constructed an experimental setup for coherent manipulation of single electron spins in diamond color centers with applications in quantum information processing and nanoscale magnetometry
7. Designed and supervised the assembly of an experimental setup for optical characterization of rare-earth ion fluorescence for studies of quantum dynamics in many-body systems
8. Measured the effect of Purcell enhancement on spin-flip induced fluorescence contrast of nitrogen-vacancy centers in nanodiamonds

Northwestern University, Evanston, IL

Sep 2008 – Apr 2014

Robert R. McCormick School of Engineering and Applied Science

Graduate Research Assistant – Center for Quantum Devices

Research topic: Type-II InAs/GaSb Superlattice Photodiodes

1. **Demonstrated the highest sensitivity in superlattice photodetectors operating at 10 μm**
2. Designed a wide bandgap p-n junction photodetector featuring reduction of all bulk dark current mechanisms while preserving quantum efficiency
3. Proposed a shallow etch based processing technique for several orders of magnitude surface leakage current suppression in SiO₂ passivated long wavelength infrared photodiodes
4. Developed an experimental technique for in-plane minority carrier diffusion length measurement
5. Fabricated world's first type-II superlattice shallow etch microjunction detectors operating in mid-wavelength infrared range

6. Fabricated a state-of-the-art long wavelength infrared type-II superlattice based focal plane array
7. Studied the quality of SiO₂ passivation in type-II superlattice photodetectors depending on device parameters and dielectric deposition conditions
8. Demonstrated long term thermal stability of type-II superlattice photodetectors up to 350°C

Royal Institute of Technology, Stockholm, Sweden

Apr 2007 - Jul 2007

School of Communication and Information Technology

Summer Research Intern – Anders Karlsson group

Research topic: Quantum Key Distribution in Quantum Cryptography

Installed and tested the non-linear frequency down-conversion setup as part of implementation of a decoy-state protocol for quantum key distribution

TEACHING AND MENTORING EXPERIENCE

Purdue University, West Lafayette, IN (2015 - present)

1. Supervised a female undergraduate student during an electromagnetic simulation project, resulting in her first-author publication in *Optics Letters*.
2. Supervised a female undergraduate student during the development of atomic force microscope-based manipulation techniques applied to nanodiamond and metal nanocube particles. **The project has resulted in the world's first demonstration of inter-substrate transfer of a pre-characterized single-photon emitter followed by its deterministic integration into a plasmonic gap nanoantenna.**
3. Supervised two undergraduate students during the programming of an automated setup for optical fluorescence scanning and location of single-photon emitters.

Northwestern University, Evanston, IL (Winter 2012- Spring 2013)

Graduate student mentor

Trained two graduate students and one undergraduate student in processing and characterization of single photodiodes and integrated arrays

Teaching Assistant

1. Prepared course slides and teach lectures to a class of graduate and undergraduate students
2. Reviewed course material with students during office hours on an individual basis
3. Supervised and managed six lab projects to provide students with deeper understanding of concepts taught in class
4. Corrected homework assignments with emphasis on teaching students clear and concise scientific communication

Outreach activity

Held educational activities designed to teach children about light and lasers in the framework of Northwestern SPIE chapter's outreach to Evanston middle schools.

High School Jean Rostand, Mantes-la-Jolie, Ile-de-France, France (9/04-04/05)

Physics and Mathematics Teacher

1. Taught Physics and Mathematics to several classes of 10th-12th grade students
2. Reviewed course material with students during office hours on an individual basis

PROFESSIONAL AFFILIATIONS AND SERVICE TO PROFESSION

Member of the Optical Society of America

Member of the IEEE Photonics Society

Reviewer: *Nature Communications, Optica, Nano Letters, Advanced Optical Materials, Optics Letters, Optics Express, Journal of the American Chemical Society, Photonics Research, Applied Physics Letters, Nanophotonics, Optics Materials Express*
